

## **New Correctional Facility for Women Construction Update for November 25, 2016**

We completed construction week #33 of the new Correctional Facility for Women in Concord; we continue to be on schedule and within budget. This week the exterior of the new minimum security housing building is being treated with a special fire proofing as seen in the photo below. Work continues on the roof and interior walls throughout the minimum security building.

Temporary, heated work areas have been constructed throughout the main building area. All trades have come up with an approved winter construction plan that allows work to continue albeit at a slightly slower pace.

Once completed, this facility will have the most modern and sophisticated security components of any detention facility in the state.
